Legislative Issue Brief - Flexible Revenue Options

Catawba County Board of Commissioner's Legislative Goal

Support flexible local revenue options to reduce the burden on the property taxpayer

Background

For several years, Catawba County has worked to secure flexible local revenue options. Catawba County is supportive of the philosophy that what one local government has as a local revenue option, should be available to other local governments. Flexible revenue options would result in less burden on property taxpayers, as the recent passage of the ¼ cent sales tax has allowed. The ¼ cent sales tax was approved by Catawba County voters in November 2007 and will be used to avoid a 3.6 property tax increase over the next three years.
